

## **Apprenticeships**

An apprenticeship is a genuine job and under all circumstances an apprentice will be employed from day one. Apprenticeships combine practical training in a job with study.

An apprentice will:

- work alongside experienced staff
- gain job-specific skills
- earn a wage and get holiday pay
- be given time for study related to their role (the equivalent of one day a week)

You may, for example, work in an entry-level job for four days a week, and study at local FE college or designated training centre for one day. Apprenticeships can take from one to four years to complete. Although you're not guaranteed a job at the end with your apprenticeship provider, you will have gained valuable work experience and have a nationally recognised qualification at the end of it, so be in a strong position to apply for employment elsewhere.

### **What do apprentices earn?**

Apprentices aged 16-18 and 19 and over earn the national minimum wage (NMW) . in the first year of their apprenticeship. You can find out the current NMW here - <https://www.gov.uk/national-minimum-wage-rates>

## Levels of apprenticeships

	Intermediate level apprenticeships (Level 2)	Advanced level apprenticeships (Level 3)	Higher Level apprenticeships (Level 4 +)	Degree Level Apprenticeships (Level 5-7)
